---

### Profile

A detail-oriented Informatics Engineering student from Airlangga University with a strong foundation in algorithms and software development. Proficient in backend development with PHP (Laravel) and mobile development with Dart (Flutter). Demonstrated problem-solving and collaboration skills through successful academic projects. Eager to apply technical knowledge and a passion for emerging technologies to contribute to impactful software and system development.

### Education

<b>AIRLANGGA UNIVERSITY</b> Bachelor Degree, Informatics Engineering	Surabaya, East Java 2023
<b>SMA N 1 SIANTAR NARUMONDA</b> MIPA	Porsea, North Sumatra 2020 – 2023

### Leadership & Activities

<b>ORGANIZATION</b> <b>HIMA D4 Teknik Informatika – Staff of Educational Department, Scientific Division</b>	Surabaya, East Java 2024 – 2025
---	------------------------------------

- Managed the end-to-end execution of a semester exam tutoring program, from planning to implementation, to enhance junior students' mastery of core academic subjects.
- Monitored attendance and engagement, collecting feedback to evaluate program effectiveness and identify improvement areas.
- Fostered a collaborative learning culture by promoting peer-to-peer knowledge-sharing initiatives and academic support within the department.

<b>ORGANIZATION</b> <b>IKAMABA UNAIR – Staff of External Division</b>	Surabaya, East Java 2024 – 2025
--	------------------------------------

- Initiated and executed a graduation appreciation program to honor senior students for their academic achievements.
- Designed the event concept, compiled the participant list, and managed logistics and documentation needs.
- Strengthened relationships between current students and alumni through meaningful and family-oriented appreciation activities.

<b>COMMITTEE INVOLVEMENT</b> <b>Organizing Committee of Teknovistafest (Web Design Competition)</b>	Surabaya, East Java 2024
--	-----------------------------

- Acted as an event committee member for Teknovistafest, a web design competition involving participants from various universities.
- Acted as Time Keeper during the event to ensure that the competition schedule was adhered to, ensuring that each session ran on time and reminding participants to stay punctual.
- Contributed to the event's promotion through social media management and outreach, increasing participant engagement.

## **Certifications**

### **UI/UX Design with Figma – Hipster Class**

Completed - 2023

- Participated in an intensive course focused on user interface and user experience design using Figma. Learned to design responsive layouts, create interactive prototypes, and apply design thinking principles in real projects.

### **Kotlin Development with Android Studio – Hacker Class**

Completed - 2025

- Completed a hands-on course on building Android applications using Kotlin and Android Studio. Covered fundamental Android components, UI design, activity lifecycle, and integration of backend APIs.

### **Junior Mobile Programming – Komdigi digitalent**

Completed - 2025

- Completed a hands-on training program on mobile application development using Flutter. Learned to build cross-platform apps with responsive UI, manage state, navigate between screens, and integrate backend APIs for real-time data handling.

## **Skills & Interests**

### **Technical Skills**

- Programming Languages: Python, Java, PHP, Dart, Go, HTML5, CSS, JavaScript
- Frameworks & Tools: Laravel, Bootstrap, Flutter, WordPress, Kotlin, Flutter
- Databases: MySQL, PostgreSQL, Laragon, MongoDB
- Development Tools: Postman, Power Designer, Figma, Virtual Memory, VScode
